Summary

- Senior double major in Computer Science and Software Development with a minor in Finance at SUU.
- Proficient in Python, JavaScript, Bash, and SQL; familiar with Docker, Linux, and Git.
- Strong interpersonal and team collaboration skills with a proactive, problem-solving mindset and hardworking.
- Built and deployed ML models using Python and Scikit-learn to automate data classification and trend analysis, with experience in SQL.

Education

B.S, Computer Science and Software Development - Minor: Finance

Southern Utah University, Cedar City, UT

August 2026

- Honors: Dean's List
- Career Center Student Programming Board: Collaborated with professional staff to orchestrate major employment fairs, implementing marketing strategies that significantly increased student engagement with career services.

A.S, Software Engineering, Snow College, Ephraim, UT

May 2024

- Honors Program Student

Experience

Student Programmer, IT Department, Southern Utah University, Cedar City, UT

May 2025 – Present

- Developed and deployed an Oracle Database Monitoring application, enhancing real-time system visibility and performance tracking for SUU's critical IT infrastructure.
- Optimized data management workflows by implementing complex SQL queries and triggers, reducing manual reporting time and increasing data accuracy.
- Architected and automated internal diagnostics using Python, leading to a more proactive IT operation and significant reduction in system downtime.
- Collaborated with cross-functional teams of administrators and faculty to maintain scalable software tools serving the entire university community.

International Student Ambassador, International Affairs, Cedar City, UT

September 2025 – Present

- Welcomed and oriented incoming international students, providing a seamless transition to life at SUU and ensuring they felt integrated into the campus community from day one.
- Served as a primary resource guide, educating new students on essential university services, academic tools, and local resources to support their success and well-being.
- Actively collaborated in the execution of campus-wide cultural events, fostering engagement and cross-cultural understanding between international and domestic students.

Founder & Managing Director, Vultur Software Group LLC, Provo, UT

February 2026 – Present

- Established and legally incorporated a software development firm, managing remote operations and cross-border business compliance between the USA and Ecuador.
- Led a development team to design and deploy AI-driven solutions, including RAG-based systems for academic and professional use.
- Represented the organization in high-stakes business competitions, securing victories and establishing strategic partnerships within the tech industry.
- Mentored junior developers and partners, fostering a culture of innovation and high performance within a startup environment.

Assistant System Administrator, IT Department, Southern Utah University, Cedar City, UT May 2025 – August 2025

- Orchestrated technical support and proactive monitoring solutions, ensuring high availability of hardware and network performance across campus.
- Spearheaded the deployment of open-source dashboards to visualize key metrics, providing leadership with actionable data for system optimization.
- Researched and recommended emerging technologies to the IT team, driving the adoption of open-source tools that enhanced system efficiency.
- Demonstrated high autonomy in diagnosing and resolving complex technical issues, consistently meeting project deadlines with minimal supervision.

Programming Assistant, Open Source Solutions Open2s, Quito, Ecuador

October 2024 – August 2025

- Engineered automation and web scraping tools using Python, streamlining data extraction and content management for high-impact web projects.
- Innovated user experience features within a Linux environment, contributing to the successful delivery of custom software solutions for international clients.
- Optimized backend workflows by integrating automated scripts, resulting in a measurable increase in data processing speed and project delivery efficiency.
- Collaborated on the full software development lifecycle (SDLC) for web applications, ensuring high-quality code standards and seamless integration within a Linux-based production environment.

Student Programming Board, Student Involvement and Leadership, Cedar City, UT September 2024 – April 2025

- Orchestrated administrative and logistical support for the Programming Board Director, ensuring the seamless execution of large-scale campus events.
- Facilitated cross-departmental communication between student leaders and university staff to synchronize event timelines, resource allocation, and institutional compliance.
- Managed high-pressure operational tasks during major university traditions like Homecoming, overseeing on-site logistics and volunteer coordination to maintain safety and engagement standards.
- Analyzed student engagement data and feedback to provide the Director with actionable insights, contributing to the continuous improvement of campus-wide programming and outreach.

Involvement Captain, Immersive Student, STIL, Cedar City, UT

September 2024 – April 2025

- Proactively joined a leadership development cohort dedicated to mastering NACE competencies, including professional communication and team collaboration.
- Applied critical thinking and problem-solving skills within a diverse group setting to develop initiatives aimed at increasing student engagement on campus.
- Utilized structured leadership training to bridge the gap between student needs and university involvement opportunities, fostering a more inclusive campus environment.
- Engaged in consistent peer-to-peer networking and mentorship, leveraging newly developed interpersonal skills to support campus outreach and student success.

Student Senator Candidate, CECS, Cedar City, UT

January 2025 – March 2025

- Campaigned for a representative seat in the SUU Student Senate, developing a platform to advocate for the academic and professional needs of over 1,000 STEM students.
- Engaged in extensive student outreach, conducting forums and surveys to identify key issues such as laboratory access and career development resources.
- Publicly presented a strategic vision for the College of Engineering, demonstrating strong communication skills and the ability to represent a diverse student body.
- Collaborated with university leaders during the election cycle to discuss institutional improvements, showing a proactive commitment to campus governance.
